

PHOENIX INFORMATION TECHNOLOGY MANAGER RECOGNIZED

For Immediate Release – February 24, 2006

Washington, DC – Phoenix International, Inc., (Phoenix) is pleased to announce that Information Technology (IT) Manager, Claudia Deborah Kutzleb, has been selected by an independent panel of judges as a member of the Federal 100 for 2005. The Federal 100 consists of the top 100 executives from government, industry, and academia who had the greatest impact on the government information systems community. Selections are based on the difference the nominee made in the way agencies and companies develop, acquire, manage, and use information technology. Ms Kutzleb was nominated and selected to the Federal 100 as a result of her work in the development and implementation of a Geographic Information System (GIS) integrated data base used by the U.S. Navy and Coast Guard in the assessment and clean-up of Hurricanes Katrina and Rita aftermath. She will be recognized in the March 20th issue of Federal Computer Magazine, and at a black-tie awards ceremony during which Eagle awards will be bestowed on one government and one industry executive recognized for their extraordinary contributions to the federal IT community in 2005.

Phoenix is a marine services company providing quality manned and unmanned underwater operations and engineering services to an international customer base. Worldwide services include Underwater Ship Inspection & Repair, US Navy & ABS Certified Underwater Welding, ROV Operations, Deep Ocean Search & Recovery, Subsea Construction Support, Submarine Rescue, and Underwater Equipment Design. Phoenix resources include divers and diving systems, one-Atmosphere Diving Systems (ADS), Remotely Operated Vehicles and associated tooling systems, and turn-key engineering design and development capabilities.
