

Commercial Diving

Surface Supplied Air & Mixed Gas

Phoenix International maintains and provides surface supplied air and mixed gas diving systems to conduct underwater tasks from the surface to 300 fsw. Available for call out 24/7, our experienced and highly qualified diving teams specialize in assisting our clients in the following areas:

- Inspections
 - Underwater Inspection in-lieu of Dry Docking (UWILD)
 - In Service Inspection Program (ISIP)
 - Hull life extension
 - Level II, III, and IV NDE
 - Platform/Riser/Pipeline
- Salvage/Decommissioning
- Topside, dry hyperbaric, and wet welding
- Underwater burning and cutting
- Platform/Riser/Pipeline repairs

Safe, Cost Effective, and Reliable Diving Solutions

Our professional and dedicated diving teams operate with a Safety First mentality. They are properly trained in all types of breathing media, from surface supplied air and mixed gas to nitrox. Nitrox diving allows for valuable cost and time savings to our clients by:

- Lengthening no-decompression times
- Extending bottom times (3 days of nitrox = 4 days of air)

Project Management

The Phoenix project management team members who support our diving personnel come with years of industry experience and can offer clear assessments and valuable planning for your project needs. From successful initiation, to planning and implementation, and finally project closure, we regularly demonstrate our ability to consistently provide underwater solutions to the oil and gas industry that meet and exceed customer requirements.

Diving Packages

Phoenix International is able to quickly and effectively mobilize diving assets for our clients with a proven track record of safety and efficiency. Our packages can be easily deployed and installed on a variety of platforms or vessels of opportunity.

Shallow air	0-40 fsw
Intermediate air	41-100 fsw
Deep air	101-190 fsw
Gas	191-220 fsw
Gas w/class II bell	221-300 fsw

Equipment

All equipment packages are provided with redundant back-up for life support. Life support equipment is maintained, serviced, and tested to meet United States Coast Guard (USCG) and Association of Diving Contractors International (ADCI) standards and guidelines. Phoenix offers

- IMCA and NORSOK compliant equipment packages
- Packages designed for commercial air transport
- Multiple equipment options to suit project requirements

Our Certifications

Phoenix International maintains a corporate wide commitment to safety and as such, is an ISO 9001:2015 Management Systems Certified Company. Other certifications include:

Phoenix International Holdings, Inc.
