

Operations Planning and Project Management Support

Whether a client requires offshore operational support, or waterfront infrastructure preparedness, proper planning is critical for the safe and efficient operation and maintenance of these projects. Phoenix's skilled and experienced staff of engineers and project managers can help develop effective strategies, methodology, and modeling of offshore operations.

Operations Planning

Phoenix engineering and project managers are well versed in commercial and military operations planning. Our project managers and Engineering Department work hand-in-hand to provide our clients with comprehensive drawings, specifications, and procedures that meet class society requirements, and to deliver practical and effective project solutions based on decades of experience.

Our engineer, working alongside our divers and project managers, provide turnkey services, including complete designs, written repair procedures, and when needed, supporting operations on the pier and in the water.

Project Management Support

Phoenix has worked for the largest global maritime companies, military branches, and foreign and domestic governments for over two decades. Trusted by owners and operators alike, our project management teams possess significant knowledge and skills in marine operations, as well as in-depth knowledge of classification society requirements.

In order to ensure all projects can maximize their potential for success, Phoenix project managers assist our clients by offering expert advice regarding each element of the project. This ensures that the appropriate resources are assigned to each project for maximized efficiency, reduced risk, and successful project delivery on time and within budget.

Key Capabilities

- Inland/Energy/Offshore Project Management
- Project Scheduling
- Client Representation
- Procedure Development
 - Inland/Energy/Offshore new construction and IRM
- Certified welding procedures
- Proposals
 - Authorization for Expenditures (AFE) Proposals
 - Cost Analysis
 - Request for Quotes (RFQ)
- Quality Management/Quality Assurance
- Risk Management

Phoenix has multiple IMCA compliant containerized surface diving systems including two double basket Launch and Recovery Systems (LARSs) for client works. These compact and efficient systems are ideal for platforms, vessels, barges, or any area where a small footprint is required to mobilize.
