

# Blanking and Cofferdam Installation

Phoenix offers blanking of overboard valves, inlets, sea chests, or any other underwater opening to assist inboard repairs. Our divers/technicians will blank off your overboard or sea chests and remove the defective valve/plating or piping, and perform steel repairs.

Additionally, Phoenix also provides cofferdam installations of all types and sizes for vessel repairs. Cofferdam repairs can be carried out on an emergency basis and custom fabricated onsite by our certified underwater welders.

## Class Certified Topside, Dry Hyperbaric, and Wet Welding

Phoenix holds American Bureau of Shipping (ABS) approval of a Class A wet underwater fillet Welding Procedure Specification for ASTM A 131 and Group II steels of the American Welding Society's D1.1 structural welding code. With this procedure, Phoenix can perform **permanent** underwater weld repairs to Classed vessels and structures.

## Partner Network & Support Facilities

Phoenix diving teams have rapid response capabilities to any port across the globe. Additionally, we have partner network and support facilities in the following locations:

Cape Town, South Africa | Cartagena, Columbia | Curacao |  
Manama, Kingdom of Bahrain | Rotterdam, The Netherlands |  
Valparaiso, Chile
